

FIXE products and Proposition 65

After checking the current list of potential risk materials included in "oehha.ca.gov/proposition-65/proposition-65-list". We have not found any material included in our products.

We were concerned about:

- Nickel included in Stainless Steel Alloys (we found that it was excluded from the list at 2018)
- Zinc, included in steel coatings (Zinc is not listed)
- Chromium, included in steel coatings (we use trivalent compounds, not hexavalent (included in the list))

So, we declare that our products does not contain any Proposition 65 listed chemical.

Sant Quirze de Besora(Barcelona), 29-03-2021
